Inspired by alpha . . .

WITTENSTEIN

The world was first introduced to servo planetary gearboxes by alpha in 1983 with the launch of the WP gearbox at Germany's Hannover Fair. The WP is now the alpha SP+, having undergone significant technological improvements since it was first unveiled. It is the most widely used servo planetary gearbox in the world and has inspired new mechanical and mechatronic solutions including the alpha LP+ and alpha TP+ gearboxes, as well as the world's most compact servo actuator and the successor to Rockwell's MPG gearmotor - the TPM+.

Company Profile

Since its foundation, the Company continues to reinvest 10% back into the design and creation of new standard motion products. In 2008, the Company changed its name to WITTENSTEIN and converted alpha to one of its leading brands. The WITTENSTEIN and alpha names both represent reliable product and superior customer service.

Industries

- Robotics
- Material Handling
- Aerospace & Defense
- Medical

Applications

- Food & Beverage Processing
- High-speed Assembly
- Pick & Place Robotics
- Positioning Systems

"We are committed to making it as easy as possible for our customers to identify and use our PartnerNetwork to address their specific challenges — whatever they need, wherever they are located."

Keith Nosbush

Chairman and Chief Executive Officer, Rockwell Automation

Core Services

Our goal is to fill your motion requirements - offering quick response times and a product that allows your drive system to be efficient and reliable. Our sales, support and engineering teams are there when you need them.

Products

alpha Gearboxes

- Inline Planetary
- Right-angle Hypoid
- Right-angle Worm

Mechanical Accessories

- Couplings

Rack and Pinion Systems

- Value Class for low duty
- Smart Class for modular mounting
- Premium Class for high duty

Servo Gearmotors

- The Rockwell MPG Successor - the TPM+ (Rockwell Enabled)

WITTENSTEIN Quality

WITTENSTEIN's commitment to quality, consistency and reliability has been rewarded with one of the most prestigious quality certifications given in business - ISO 9001:2000 certification.

The WITTENSTEIN Quality Management System is a systematic way of working that ensures consistency and facilitates improvement in our products, processes and services. Our commitment to quality demonstrates our dedication in providing products and services on which customers can rely.

PartnerNetwork™

The PartnerNetwork program is a framework of well-managed relationships formed as a result of customer need. It provides manufacturers with access to a local, regional and worldwide network of best-in-breed specialists. These partners offer the industry experience and technological know-how to help solve business challenges both large and small.

Through the PartnerNetwork program, Rockwell Automation delivers a wide array of solutions, easier access to knowledge, and consistent delivery of solutions to help improve our customer's business results.
